Energy

Qualys customer since 10 Years

“Automation is key to our operations at SLB. **It enables us to** maintain high productivity with a small team, effectively manage campaigns, and handle data from 85 countries to meet our business requirements.”

Doing More with Automation

How does deliver measurable value?

Optimize Process for Security

SLB leveraged automation and campaign management to manage data across 85 countries with a lean team efficiently.

Managing Product Intelligence & Vulnerabilities

SLB combines diverse threat intelligence sources to automate vulnerability responses while safeguarding their sensitive information.

Using VMDR For Threat Hunting

SLB leverages cloud tools plus VMDR for productivity, threat intelligence and threat hunting.

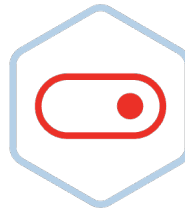

- ✓ Offices, R&D, operation and remote locations
- ✓ 85+ countries
- ✓ Distributed workforce
- ✓ Complex process across multiple product lines

Outcomes for SLB with VMDR

90% faster vulnerability detection through automation. MTTD reduced from 10 to 3 days.

Improve critical vulnerability detection and response by 90% through campaigns and threat intelligence.

Extended vulnerability detection and response to remote locations AKA (OT), **with no impact on business operation**
