

Qualys Certificate View

Release Notes

Version 2.5.0

February 3, 2020

Qualys Certificate View 2.5.0 brings you many Improvements and updates!

Issues addressed in this release

In this release we have fixed the following:

- Scans are now executed successfully even when the reference number is more than 36 characters.
- External sites are now successfully deleted after a previous attempt to remove multiple sites at a time were failing.
- We fixed an issue where we can now retrieve scan status with a specific scan reference number.
- Fixed a bug where the results were inaccurate when using the NOT operator in queries.
- You can now search for issuers that do not have a Common Name (CN) attribute in the Subject DN, by using the query: issuer.name:``
