

Qualys Certificate View

Release Notes

Version 2.5.2

March 31, 2020

Here's what's new in Qualys Certificate View 2.5.2!

[Enhancements to Certificate View Alerts](#)

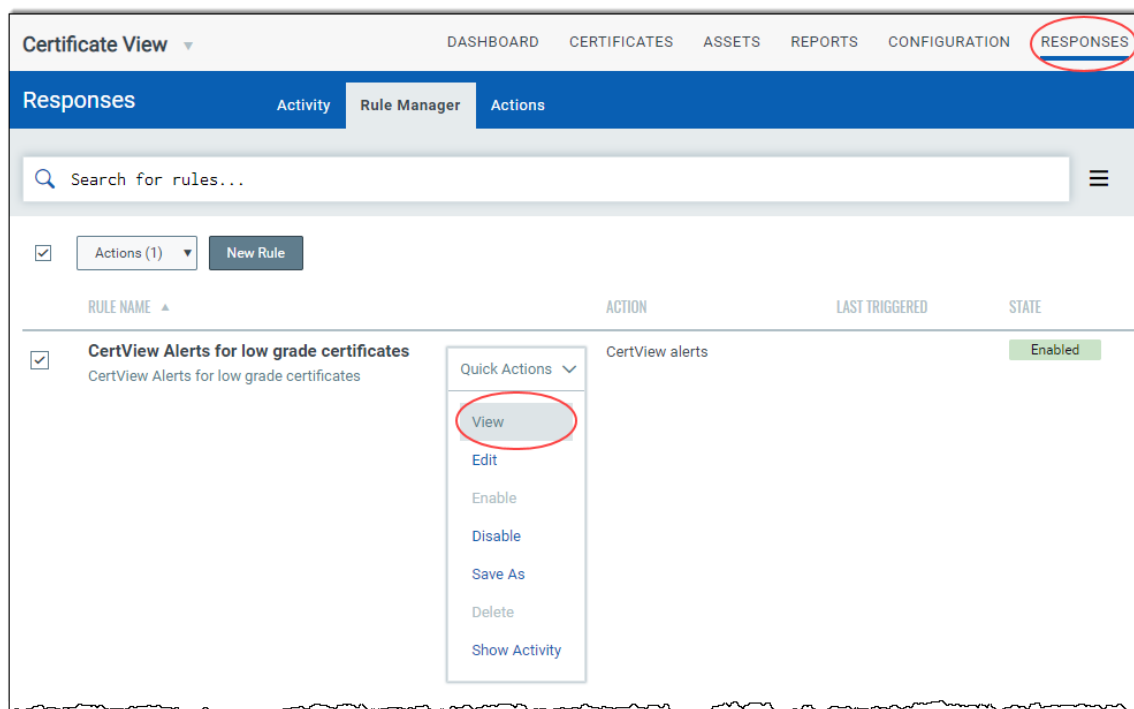

Qualys Certificate View 2.5.2 brings you many more Improvements and updates! [Learn more](#)

Enhancements to Certificate View Alerts

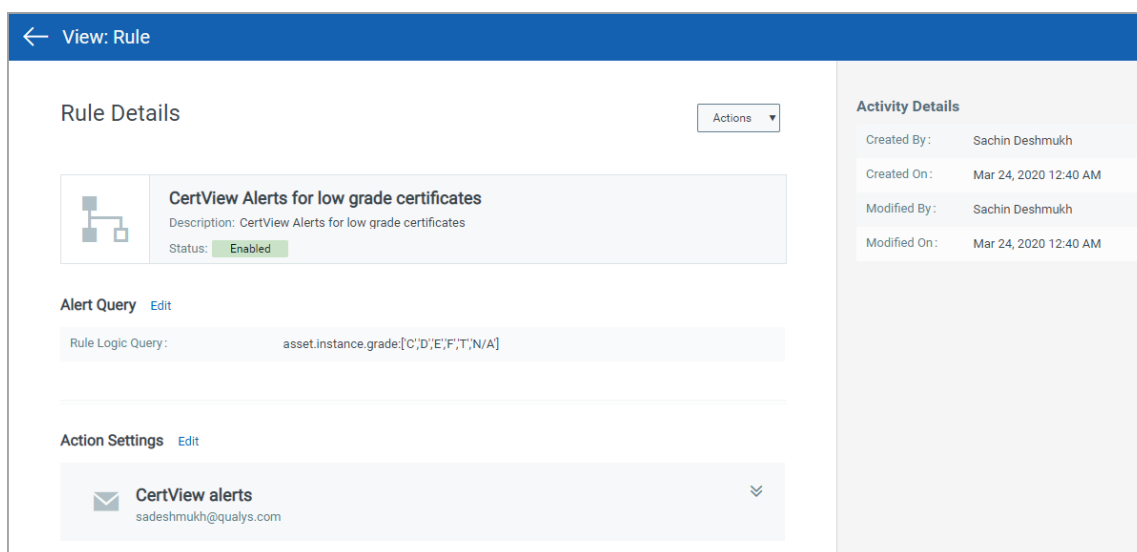

We have made few enhancements to alerts for better usability. The Alerts tab is now renamed to Responses tab.

You can now also view the Actions and Rules that you have created in the Responses tab.

For example to view a rule, navigate to Responses > Rule Manager and choose a rule. From the Quick Actions menu select View to view details of the selected rule.

The view details window opens to show all the details of the rule or action you created.

Issues addressed in this release

- We are incrementally working on improving our UI error messages so as to make them more informative and user friendly. With this release we have fixed some issues and will continue to fix more in upcoming releases.
