# Qualys Cloud Agent Linux 2.3.4

February 2019

We're excited to tell you about new features, platform coverage changes, improvements, and bug fixes in this Cloud Agent release. These updates are specific to the agent binary. Qualys Platform backend, UI, and API updates for new features and fixes of management and reporting capabilities of Cloud Agents are documented in the Cloud Suite release notes and may be released on a separate schedule.
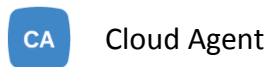

CA Cloud Agent

New Features

There are no new features in this release.

Enhancements

There are no new enhancements in this release.

Behavior Changes

Added documented support for additional http proxy configuration syntax. See the Cloud Agent Linux Install Guide for more information on how to configure proxy support.

- Added support for "http://" URL prefix

    https_proxy=http://[<username>:<password>@]<host>[:<port>]

    or

    qualys_https_proxy=http://[<username>:<password>@]<host>[:<port>]

- Added support for no URL prefix

    https_proxy=[<username>:<password>@]<host>[:<port>]

    or

    qualys_https_proxy=[<username>:<password>@]<host>[:<port>]
