

Qualys Cloud Agent Linux 4.8 (x64)

February 2022 (Updated March 2022)

We're excited to tell you about new features, improvements, platform coverage changes, and fixes in this Cloud Agent release. These updates are specific to the agent binary. Platform updates for new features and fixes of management, syncing, tagging, and reporting capabilities of Cloud Agents are documented in the Cloud Platform and Cloud Suite release notes.

New Features

- Patch Management (PM) module is supported for the Cloud Agent on the following platforms:
 - Oracle Enterprise Linux (OEL) 6.x, 7.x, and 8.x
 - Amazon Linux 2015.09 through 2018.03
 - Amazon Linux 2 2017.03 through 2.0.2021

Enhancements

With this release, the agent performs a Vulnerability Scan immediately after patching.

Behavior Changes

There are no behavior changes in this release.

Platform Coverage Support (Operating Systems)

- Alma Linux 8.3, 8.4, and 8.5

Fixed Defects

The following reported and notable issues have been fixed in this release.

ID	Description
LXAG-10934	We fixed an issue where 'rpm -V' command was changing permissions and adding an extra line with '.M..... /usr/local/qualys/cloud-agent/bin/fim-audisp-plugin' content.
LXAG-10883	Fixed an issue where the Linux x64 installer was having support for all architecture and it was leading to discrepancies while installing such agents. With the fix, the Linux x64 installer is made architecture specific. For example, If you're on Linux ARM, you won't be able to install Linux x64 agent.

Known Limitations and Workarounds

- FIM/EDR events not getting parsed successfully on the Oracle Enterprise Linux 7.5
