

Qualys Cloud Agent Unix 4.20

August 2023

We're excited to tell you about new features, improvements, platform coverage changes, and fixes in this Cloud Agent release. These updates are specific to the agent binary. Platform updates for new features and fixes of management, syncing, tagging, and reporting capabilities of Cloud Agents are documented in the Cloud Platform and Cloud Suite release notes.

New Features

Added support for Custom Assessment and Remediation (CAR) application on the AIX 6.1, AIX 7.1, AIX 7.2 and AIX 7.3 platforms. Now, Qualys CAR can be used to execute custom scripts to improve the compliance and security posture of the AIX assets in your network.

Supported Scripting Languages—Lua, Perl, Python, Shell

Required application version: Custom Assessment and Remediation 1.8.0.0

Enhancements

There are no enhancements in this release

Behavior Changes

There are no behavior changes in this release.

Fixed Defects

ID	Description
CRM-104615	Fixed an issue where Cloud Agent for AIX did not detect the latest version of the application installed on the AIX machine, as the last modified timestamp was the same for the latest version and earlier version of the application. Now, the Agent will detect the latest version of the application irrespective of the last modified timestamp.

Known Limitations and Workarounds

There are no reported and notable issues open in this release
