Qualys Cloud Agent Windows 1.6.2

We're excited to tell you about new features, platform coverage changes, improvements, and bug fixes in the Cloud Agent Windows 1.6.2 release, including changes introduced in the 1.6.1 release. These updates are specific to the agent binary. Platform updates for new features and fixes of management, syncing, tagging, and reporting capabilities of Cloud Agents are documented in the Platform and QWEB release notes.

CA Cloud Agent
New Features

No new features in this release.

Enhancements

- Uninstaller application is now digitally signed.

Behavior Changes

- First install behavior now provisions, download config file, download manifests, and executes initial inventory scan in sequence without waiting on agent status interval between actions reducing initial inventory scan to 4 minutes (on average) after installation from 1.5 hours in the previous version.

Platform Coverage Support (Operating Systems)

No platform coverage changes in this release.

Fixed Defects

The following known reported and notable issues have been fixed in this release:

ID	Description
CRM-31668 CRM-30710 CRM-29948 CRM-29266 CRM-27477	Fixed an issue where agent appears to stall during scan

CRM-31573 CRM-30334 CRM-29099	Updates to Policy Compliance CID accuracy
CRM-30710	Fixed an issue where agent stops communicating with platform after manifest download
CRM-30375 CRM-30211 CRM-29841	Fixed an issue where agent gets reprovisioned when installed in AWS EC2 or Azure cloud providers leading to duplicate agent UUIDs in the platform
CRM-30163	Fixed an issue via manifest change where WMI query for Win32_QuickFixEngineering times out on older Windows versions
CRM-28983	Changed share mode for CreateFile for cases with ASP.NET Temporary files
CRM-28971	Version 1.5.6 agents do not upgrade to 1.6.0 in some cases
CRM-27702	Fixed an case where an agent scan failed due to an access violation
CRM-30945 CRM-27423	Fixed an issue where agent is stuck in an upload loop if the changelist.db file is deleted by an external process
CRM-29948 CRM-25794	Fixed an issue with profile corruption in the registry on Windows 2008 R2 Servers
CRM-28618	Uninstall.exe is now signed

Known Limitations and Workarounds

The following new known limitations are opened in this release:

ID	Description
CRM-30107	FN QID 91229 due to Microsoft API returning invalid results; working with the vendor to verify
CRM-28626	If the disk of the machine is full, the sequence number is not saved to the local configuration file resulting in duplicate agent UUIDs
CRM-28298	Policy Compliance CID security descriptor returned by agent is different thus failing the control in Agent tracking
