This release has no new features.

Enhancements

This release has no new enhancements.

Behavior Changes

This release has no new behavior changes.

Platform Coverage Support (Operating Systems)

This release has no new platform coverage support.

Fixed Defects

The following reported and notable issues have been fixed in this release.

ID	Description
CRM-42449 CRM-54688	Fixed an issue where certain local user profiles are locked or corrupted when the agent reads ntuser.dat file during a read race condition. This has been reported on servers with a high number of user profiles such as multi-user machines and terminal servers.
CRM-56669	Fixed an issue where the Patch Management client UI defer request was not being honored for the configured duration.
CRM-49923	Fixed an issue where Windows Agent version 1.6 installed in public cloud providers was not collecting cloud provider metadata after upgrading to a newer release.
CRM-51521	Fixed a non-functional configuration issue for agents packaged for PCP deployments.

CRM-54359 CRM-55705	Fixes a rare issue where agent cannot process its upload finalize call preventing further processing. Agents in this state will scorch and correct itself upon upgrading.
CRM-53088 CRM-53763 CRM-55548	Fixes miscellaneous issues for Patch Management related to patch scans and patch deployment jobs.
CRM-42820	Fixed by a manifest release deployed the week of October 14 2019, not tied to or requiring an agent binary release.

Known Limitations and Workarounds

There are no reported and notable issues are open in this release.
