Qualys Cloud Platform (VM, PC) 10.x

Release Notes

Version 10.17.1
February 16, 2022

We addressed the following issues in this release of the Qualys Cloud Platform (VM, PC).

Issues Addressed

- We fixed an issue where customers got an "Invalid (RSA) private-key" error when trying to save a new/updated Unix authentication record with an RSA private key that was generated in FIPS mode with PKCS8 format.

- We fixed a UI issue where vault options were not showing up in authentication records for MySQL, Sybase, MariaDB and VMware even though these record types support vaults.
