Qualys Cloud Platform v2.x

Release Notes

Version 2.36.1
February 27, 2019

Qualys Cloud Platform 2.36.1 brings you the following improvements and updates:

AV   Asset View

- When searching assets in AssetView you'll see an updated help tip and better examples for netbiosName that include case sensitivity.
- When you download cloud agents from AssetView your CSV report will correctly show data in the Last Inventory column.

CS   Container Security

- Fixed an issue where the Customize Data Widget screen showed "Delete" in place of "Die" in the query for Container Events (Kill, Destroy, Die).
- Fixed an issue where sub-users were not able to login to the Container Security App on the Qualys Cloud Platform.

CA   Cloud Agent

- API for bulk agent uninstallation now mandates that the service request body cannot be empty and there should be at least 1 criteria specified.
- Scanned data by the SCA agent is now displayed appropriately in the Compliance tab.
- We fixed an issue on the Agents tab in the Cloud Agent UI where users were not able to sort the list by the Last Activity column.

SAQ   Security Assessment Questionnaire

- We have updated the UI text to list all the file types supported as attachments in the questionnaire.
