Qualys 8.9.2.1 Release Notes

This new release of the Qualys Cloud Suite of Security and Compliance Applications includes the following fixes.

Issues Addressed

- Fixed an issue where we weren't updating the Last Found date and Times Found count for certain Information Gathered QIDs when new scan results were processed.

- Fixed an issue in the XML output for Scheduled Scan API v2 (/api/2.0/fo/schedule/scan/). We now use CDATA for the parameters TAG_SET_INCLUDE and TAG_SET_EXCLUDE to handle special characters.

- Fixed an issue on the Edit Asset Group page where scanner appliances selected for the asset group were not displayed.

- Fixed UI issues visible when using an Internet Explorer browser. The EC2 Scan Launch page was missing certain components when viewed in IE.

- Fixed a typo in the Remediation Info heading in the New Compliance Policy Template.
