

# Qualys CloudView v1.x

Version 1.25.1.0

December 05, 2022

**Qualys CloudView 1.25.1.0 brings you improvements and updates!**

## Issues Fixed In This Release

- We fixed an issue where the control evaluation for pass results showed the wrong message.
- We changed the detection logic of CID338 to ensure the control doesn't fail for load balancers attached with protocols other than TLS.
- We fixed an issue where the resource count was shown different in CloudView and Connector screens due to wrong QQL.
- We have removed the "Edit" option on CloudView for unmerged connectors. Connectors can be edited on the Connector application.
- We fixed an issue where the the US GovCloud region was failing when creating connectors.
- We fixed an issue where the creation of connector in CloudView cannot be completed because of a mismatch in the account ID.
