

# Qualys Container Scanning Connector for Azure DevOps

## Release Notes

Version 1.0.0

July 15, 2020

### Container Security Plugin for Azure DevOps

Qualys Container Security provides a plugin for Azure DevOps to get the security posture for the container images built via the Azure DevOps CI/CD tool. The plugin can be configured to fail or pass the container image builds based on the vulnerabilities detected. See [Qualys Container Scanning Connector for Azure DevOps User Guide](#) for detailed information on the plugin.
