

Qualys Container Scanning Connector for Jenkins

Release Notes

Version 1.6.2.5

July 23, 2021

Here's what's new in the Container Scanning Connector for Jenkins!

With version 1.6.2.5, we now provide a new drop-down option that contains pre-populated list of Qualys platforms. You can simply pick your Qualys platform from the options populated.

Note: It is recommended that you reconfigure your existing Qualys Container Scanning operations with Freestyle and/or Pipeline Jobs post-upgrade to v1.6.2.5

The screenshot shows the configuration interface for the Qualys Container Scanning Connector for Jenkins. It is divided into two main sections: 'API Login' and 'Data Collection'.

API Login

Provide details for accessing the Qualys Container Security API.

Your Qualys Portal

A dropdown menu is shown with 'US Platform 1' selected. This section is highlighted with a red rectangle in the original image.

Credentials

A text input field contains 'john_doe/***** (john_doe)' and an 'Add' button is next to it.

☐ Use Proxy Settings

Data Collection

Qualys vulnerability data will be collected per these settings. For each enter a value in seconds or an expression like 2*60*60 for 2 hours or 2*60 for 2 minutes.

Frequency

How often to check for data

30 seconds.

Timeout

How long to wait for data

600 seconds.

A 'Test Connection' button is located in the bottom right of the 'API Login' section.
