Qualys Container Security

Release Notes

Version 1.20
October 28, 2022

Here's what's new in Container Security 1.20!

New Region Supported for AWS Fargate (ECS)

New Region Supported for AWS Fargate (ECS)

We first added support for scanning container images in AWS Fargate (ECS) in Container Security version 1.18. AWS Fargate is a serverless compute engine for containers that works with Amazon Elastic Container Service (ECS).

Now we've expanded on this support to include an additional AWS region: **eu-west-1**. You'll need the S3 bucket name for this AWS region when configuring the ECS scanning Lambda function.

Qualys CS Lambda Function S3 Bucket Name

For the newly supported region, you'll need the following bucket name.

AWS Region: eu-west-1

Bucket Name: qualys-cs-image-scanning-lambda-function-eu-west-1

Learn more

To learn how to set up AWS ECS Fargate image scanning, please refer to the "Scan Container Images in AWS Fargate (ECS)" section of the Sensor Deployment Guide.
