

Qualys Container Security

Release Notes

Version 1.6.5

April 13, 2020

Here's what's new in Container Security 1.6.5!

New search token

Container Security 1.6.5 introduces the following new search token:

scanType - This token available for Image search takes the values STATIC or DYNAMIC to search for images scanned using static/dynamic scanning.

Static scanning of Docker images was introduced in container sensor version 1.3.0. For more information refer to the [Qualys Container Security Sensor Deployment Guide](#).
