[Change to Integrations page](#)

Container Security 1.6.6 brings you more improvements and updates! [Learn more](#)

ImageID column added to Containers List CSV report

A new column to display the image ID for each container has been added to the Containers List CSV report. Download this report by going to Assets > Containers and choosing the Download option above the data list (on the right side). When you filter the list using a search query your downloaded report will only include the containers that match your query.

Here's a sample report showing the new IMAGE ID column.

	A	B	C	D	E	F	G	H	I	J	K	L	M
	CONTAINER NAME	CONTAINER ID	IMAGE ID	CREATED ON	HOST NAME	HOST IP	STATE	STATE CHANGED	LAST SCANNED	VULNERABILITIES			
1	container1	fd0ff222d2ae8	703bc6af7e6e	2020-02-28T10:01	ip-10-90-3-186	10.90.3.186	RUNNING	2020-02-28T10:01	2020-03-12T03:29	Sev1: 0	Sev2: 0	Sev3: 1	Sev4: 0 Sev5: 0
3	container2	7fc388bee86d	abd4f491ddb7	2020-02-28T10:01	ip-10-90-3-186	10.90.3.186	STOPPED	2020-02-28T10:01:47.245+05:30		Sev1: 0	Sev2: 0	Sev3: 0	Sev4: 0 Sev5: 0
4	container3	28187d89f8fd	abd4f462ddb7	2020-02-28T10:01	ip-10-90-3-186	10.90.3.186	STOPPED	2020-02-28T10:01:46.468+05:30		Sev1: 0	Sev2: 0	Sev3: 0	Sev4: 0 Sev5: 0

New search tokens for container runtime

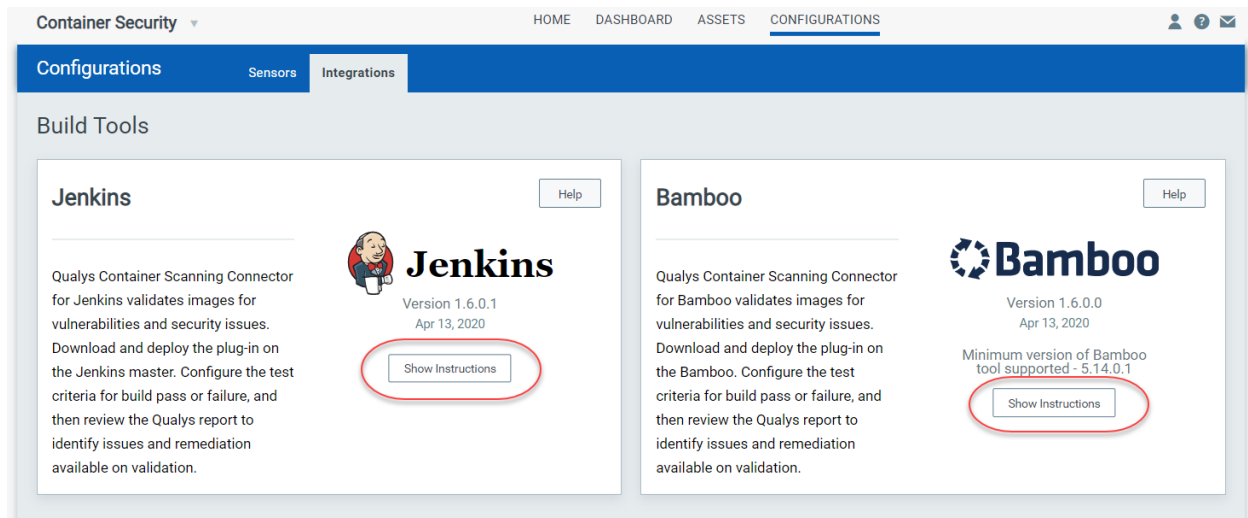

These new search tokens are available when searching sensors:

containerRuntime – This token is available to find a container based on the Runtime type. Possible values are Docker and ContainerD.

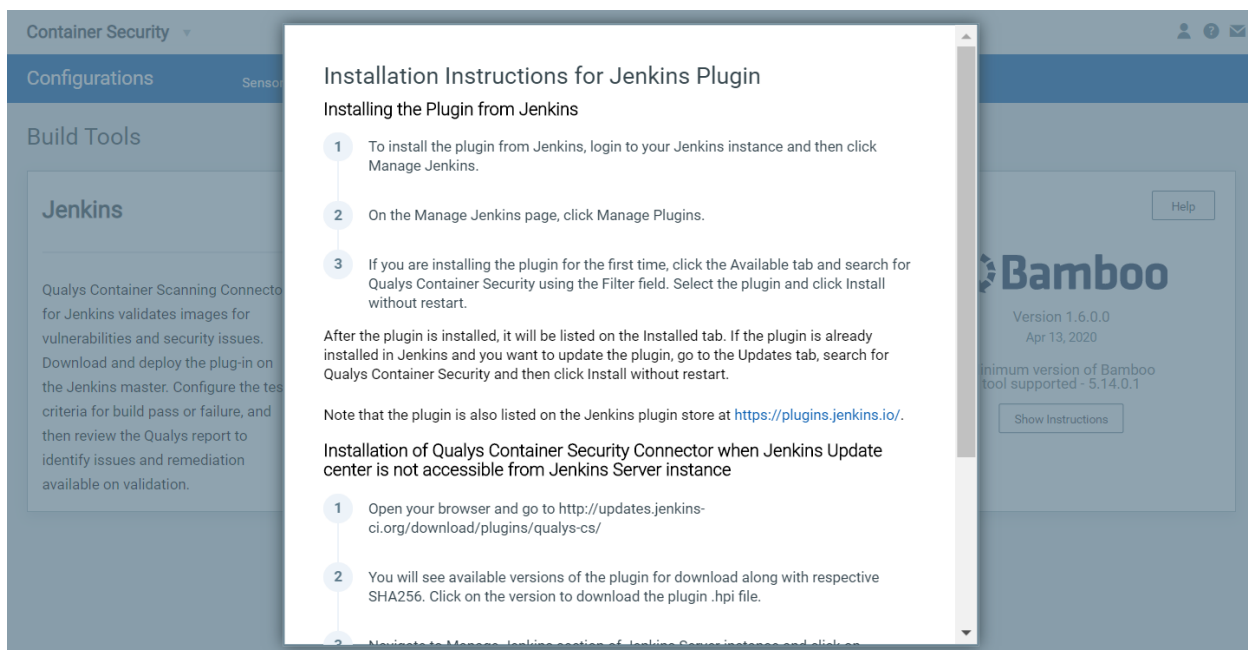

containerRuntimeVersion – This token is available to find the Runtime version you're interested in. This is either the Docker version or the ContainerD version.

Change to Integrations page

The next time you go to Configurations > Integrations you'll notice that the Download button for the Jenkins and Bamboo plugins has been replaced with Show Instructions. This way we can provide you with all the information you need, all in one place. Click this button and you'll get detailed step-by-step installation instructions along with details on how to get the plugin.

For example, here are the instructions you'll see for Jenkins.

Issues Addressed

- We fixed an intermittent issue with associations between images and containers.
- We fixed an issue where sub-users with UI access to the Container Security module got a 404 (Page Not Found) error when selecting the module from the module picker.
