

Qualys Container Security v1.x

Release Notes

Version 1.5.1

February 15, 2019

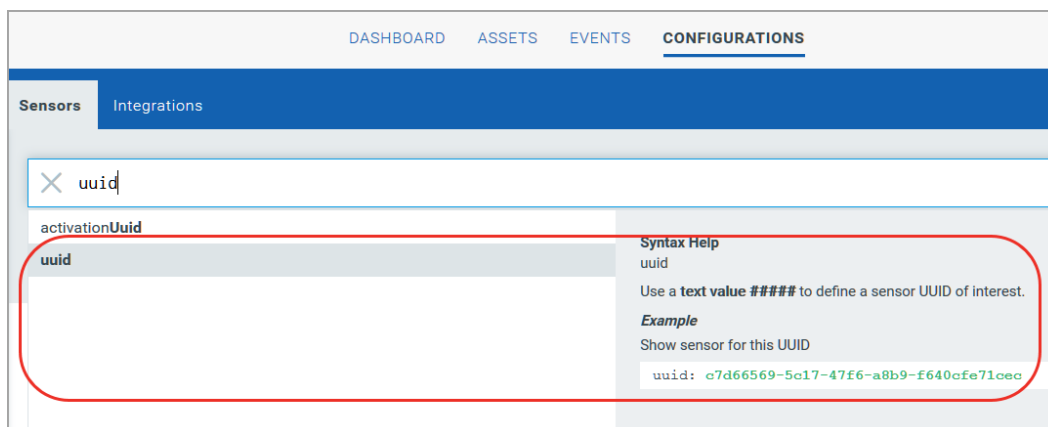

Here's what's new in Container Security 1.5.1!

[Search sensors by UUID](#)

[Fixed issues](#)

Search sensors by UUID

You can now search sensors using the sensor UUID search token.

The screenshot shows the 'CONFIGURATIONS' tab in the Qualys Container Security interface. Under the 'Sensors' sub-tab, there is a search bar with the text 'uuid' entered. Below the search bar, a table lists search tokens. The first token is 'activationUuid'. The second token is 'uuid', which is highlighted with a red rounded rectangle. To the right of the 'uuid' token, there is a 'Syntax Help' section. It states: 'Use a text value ##### to define a sensor UUID of interest.' It also includes an 'Example' section: 'Show sensor for this UUID' followed by the example UUID: 'uuid: c7d66569-5c17-47f6-a8b9-f640cfe71ce0'.

Search Token	Syntax Help
activationUuid	
uuid	Syntax Help uuid Use a text value ##### to define a sensor UUID of interest. Example Show sensor for this UUID uuid: <code>c7d66569-5c17-47f6-a8b9-f640cfe71ce0</code>

Fixed issues

The following issue is fixed in release 1.5.1:

- Fixed an issue where the image list downloaded in CSV format contained duplicate entries for some images listed on the UI.
