Container Security

Release Notes for Sensor Deployment from Docker Hub (Beta)

Version 1.3.1

March 12, 2020

Here's what's new in the Container Security Sensor!

Install the sensor from Docker Hub

The Container Security Sensor is now available on Docker Hub. You can install the sensor on your hosts using "docker compose" or "docker run". You can also install the sensor on Kubernetes from Docker Hub.

For information on the required steps and prerequisites, refer to the section "Installing the sensor from Docker Hub" in the Qualys Container Security Sensor Deployment Guide.

Note: The Qualys Container Sensor image hosted on Docker Hub does not support auto update.
