Container Security

Release Notes for Sensor

Version 1.3.3
April 24, 2020

Here's what's new in the Container Security Sensor!

Support for Azure Container Registry

The Container Security Sensor now supports scanning Azure Container Registry (ACR) images for vulnerabilities. To learn how to set up an ACR scan, see the Qualys Container Security User Guide.

Performance Optimizations

We made performance optimizations in the sensor for running in Docker-in-Docker mode. To learn how to install the CI/CD sensor in your Docker-in-Docker environment, see the Qualys Container Security Sensor Deployment Guide.
