

Qualys Endpoint Detection and Response v1.x

Release Notes

Version 1.8

February 21, 2022

Endpoint Detection and Response 1.8 brings you some improvements.

[Issues Addressed](#)

Issues Addressed

- We fixed an issue where you could install the Antimalware on the asset, even though EDR was not enabled for that asset.
- We fixed an issue where if you searched for events related to a particular asset, events that were not related to the asset were returned instead.
- We fixed an issue where you could not use the **Specific range** option to filter events.
- We fixed an issue where when you tried to see the event details for some recent events, the **Unable to fetch the Event details. Contact Qualys Support** error message was shown.
