

# Qualys Endpoint Detection and Response v2.x

## Release Notes

Version 2.2.2

December 1, 2022

Here's what's new in Endpoint Detection and Response 2.2.2!

### What's New

[Updated Feature Compatibility for Windows Operating Systems](#)

[EDR In-Product Trial](#)

Endpoint Detection and Response 2.2.2 brings you some improvements and updates!

## Updated Feature Compatibility for Windows Operating Systems

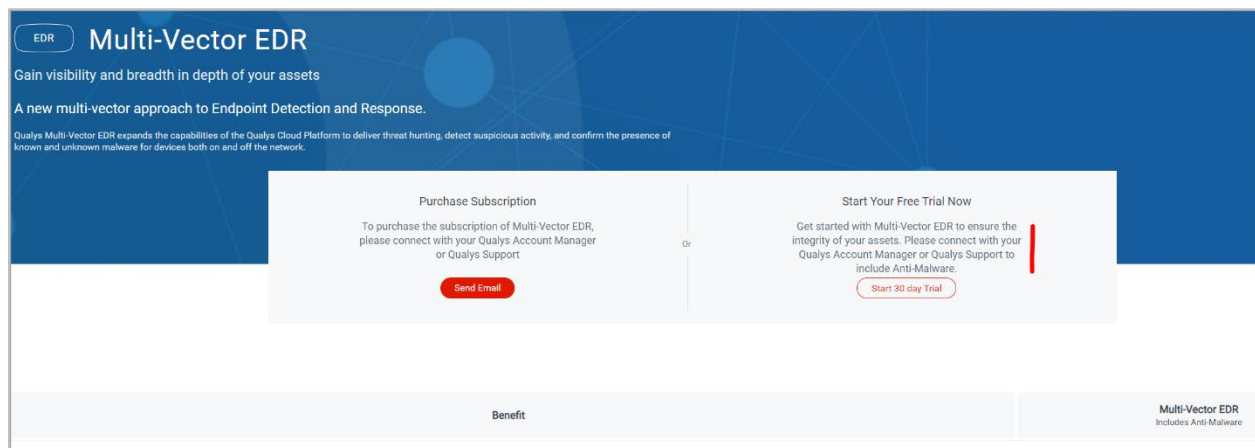

In this release, we have updated the feature compatibility mapping with Windows operating systems. The following versions of Windows operating systems are now compatible with the Traffic Scan, Network Monitor, and Antiphishing features:

- Windows 10 Server (2016, 2019, 2022, Core)
- Windows 8.1 Server (2012 R2, Core)
- Windows 8 Server (2012)
- Windows 7 Server (2008 R2)

## EDR In-Product Trial

In this release, we have introduced the EDR In-Product trial for all Qualys applications. The In-Product trial is of 30-days for each user, including 100 assets, with no restriction on data volume. The EDR in-product trial version also includes an Anti-malware feature. Contact Qualys Account Manager to have Anti-Malware in the trial version.

To enable the trial version from the drop-down list of the modules, scroll to the Endpoint Detection and Response, and click **Start Trial**. You will be redirected to the homepage of Multi-Vector EDR.

Once the trial period is expired, the application is unavailable, and the following window is displayed:
