Qualys Patch Management
Release Notes

Version 1.3.1.0
October 11, 2019

Patch Management 1.3.1.0 brings you the following improvements:

Fixed Issues

- Editing a job schedule with no patch window was throwing an error.
- Improper/blank error messages were shown when vendor patch file failed signature/hash validation.
- OnDemand jobs were not shown in the list of patches displayed upon clicking "Remove Patch".
- An invalid date was shown in job details for a job scheduled monthly on a specific day of the week.

Performance Improvements

We have done a number of performance improvements to fine tune patch assessment, deployment and uninstallation.
