

Qualys Patch Management v1.7

API Release Notes

Version 1.7

April 13, 2022

Qualys Cloud Suite API gives you many ways to integrate your programs and API calls with Qualys capabilities. You'll find all the details in our user guides, available at the time of release. Just log in to your Qualys account and go to Help > Resources.

What's New

[Change in the "type" Input Parameter Value](#)

Qualys API Server URL

The Qualys API URL you should use for API requests depends on the Qualys platform where your account is located.

[Click here to identify your Qualys platform and get the API URL](#)

This documentation uses the API gateway URL for Qualys US Platform 2 (<https://gateway.qg2.apps.qualys.com>) in sample API requests. If you're on another platform, please replace this URL with the appropriate gateway URL for your account.

Change in the "type" Input Parameter Value

API affected	/rest/pm/v1/deploymentjob
New or Updated APIs	Updated

With this release, we have changed the uninstall job type to the rollback job type. While creating a new Windows rollback job, you must now use the rollback value for the type input parameter in the request body of your job.

Input Parameters

Use this parameter and value to create a rollback job.

Parameter	Description
type (string)	(Mandatory) Specify the job type. Old value: Uninstall New value: Rollback

Sample - Create a Windows Rollback Job

API request:

```
curl -X POST
"https://<QualysBaseURL>/pm/v1/deploymentjob" -" -H "accept:
application/json"-H "Authorization: Bearer <<jwt token>>"
```

Request Body

```
-d '{
  "name": "Winodws Public API job 5",
