

Qualys Unified Dashboard v1.x

Release Notes

Version 1.4

March 20, 2023

What's New

[Recycle Bin for Dashboards](#)

[Added Show Ratio as Percentage in Numerical Widget](#)

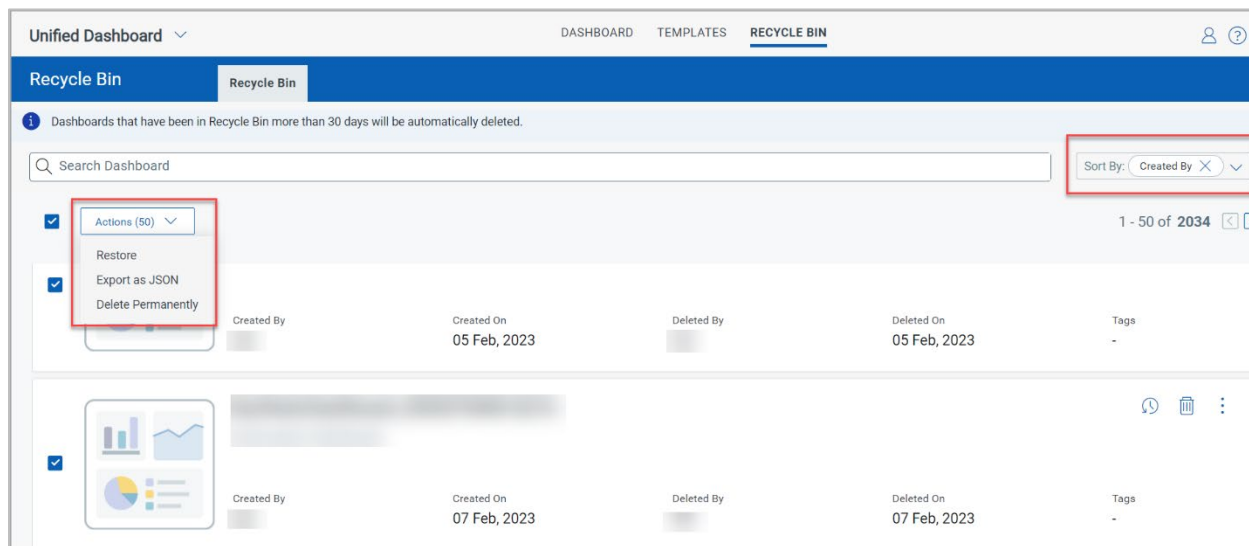

[Introduced Reporting Schedule](#)

Qualys Unified Dashboard 1.4 brings you many more improvements and updates! [Learn more](#)

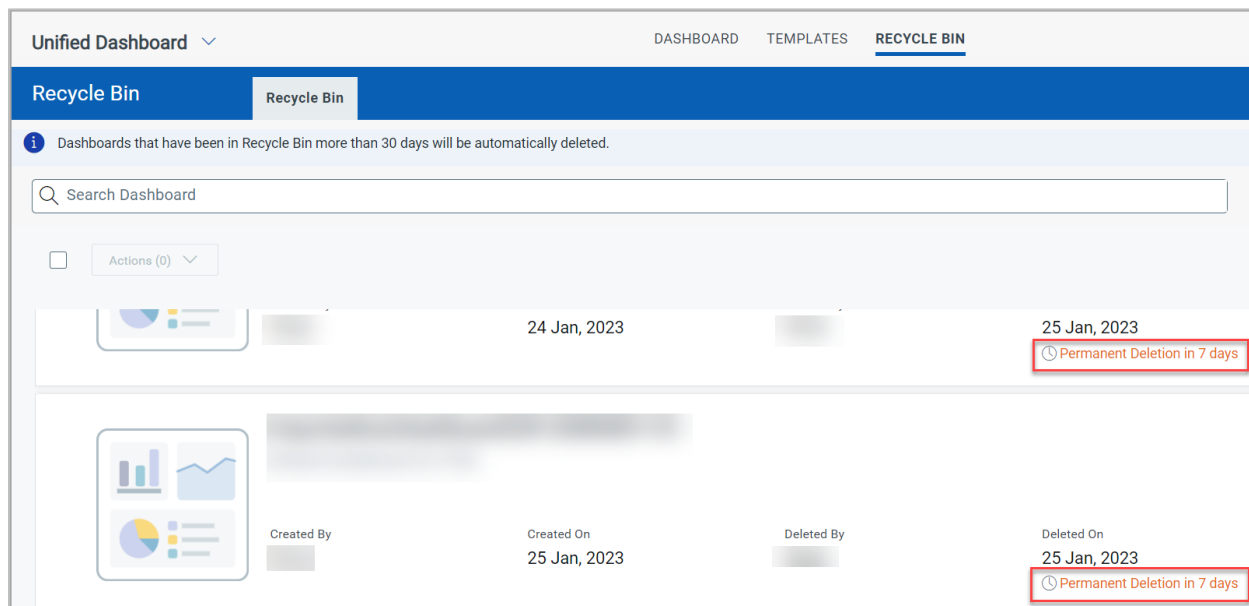

Recycle Bin for Dashboards

With this release, we have introduced Recycle Bin for dashboards. The deleted dashboards from any applications are moved to **Recycle Bin** of the Unified Dashboard. These dashboards are retained for 30 days. Select the required option to sort the dashboards from the **Sort By** drop-down.

After you delete a dashboard, you can perform **Restore**, **Export as JSON**, or **Delete Permanently** actions on the dashboards in the **Recycle Bin**. A sub-user can perform all these actions if the respective **Dashboard Permissions** are assigned.

The dashboards that will be permanently deleted in 7 days or less will be highlighted with a timeline. Following screenshot is an example of dashboards that will be permanently deleted in 7 days.

Added Show Ratio as Percentage in Numerical Widget

In the **Numerical** widget for the **Ratio Function Type**, you can now select **Show Ratio as Percentage (%)** to switch the output from ratio to percentage. The output generated in percentage helps you to view the changes or adjustments to be done for remediation.

The screenshot shows the 'Edit Widget (VMDR)' interface. On the left is a sidebar with navigation options: 'Widget Details' (selected), 'Query Settings', 'Advanced Settings', and 'Display Settings'. The main area is titled 'Widget Details' and contains the following fields and settings:

- Select Application:** A dropdown menu with 'Vulnerability Management' selected.
- Widget Name:** A text input field containing 'Assets in VM' with a character count of '58 characters remaining'.
- Show description on widget:** An unchecked checkbox.
- Function Type:** Three radio buttons: 'Count', 'Ratio' (selected), and 'Average'.
- Show Ratio as Percentage (%):** A checked checkbox, highlighted with a red rectangle.
- Widget Representation:** Two radio buttons: 'Regular' (selected) and 'Summary'.

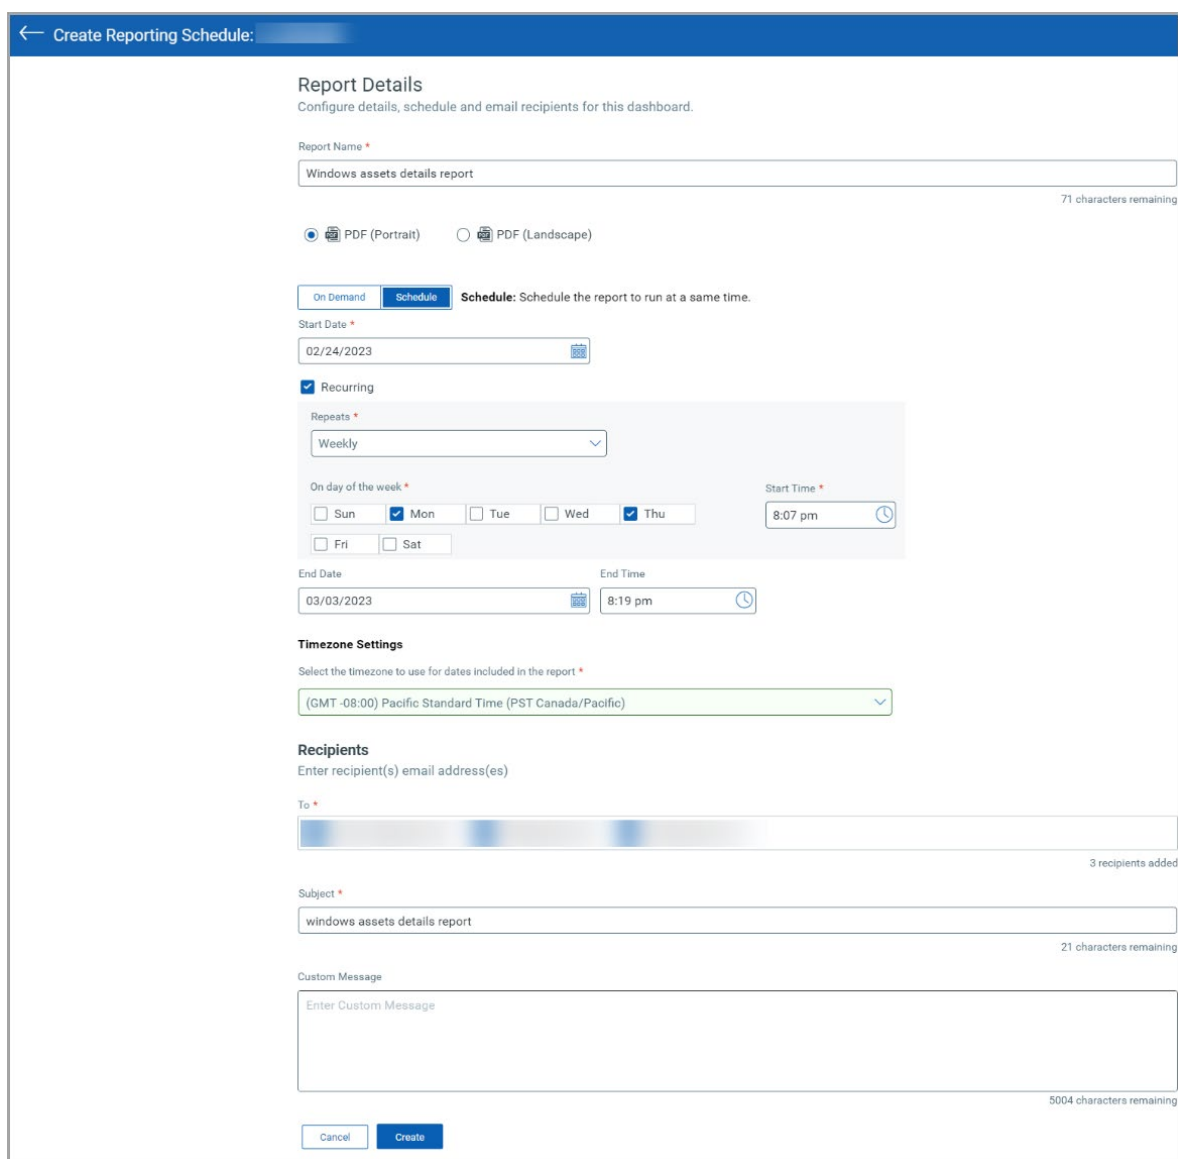

On the right side of the interface, there is a preview of the widget. It shows a blue header with '1K Numerical' and a white box below it containing the text 'Assets in VM'.

Introduced Reporting Schedule

The Reporting Schedule feature is newly introduced in this release, allowing you to share dashboard reports via email. You can create up to five On Demand and/or Schedule dashboard reports to share across the selective recipient(s). The reports are generated in PDF format with Portrait or Landscape orientation. You can create a Reporting Schedule if the reports have at least one TP/VMDR widget.

You can create a Reporting Schedule from the **Dashboard** tab > Tools  menu > **Report Scheduling**. Click **Create Schedule**. Choose **On Demand** or **Schedule** report from the **Create Reporting Schedule** page. When you select the **Recurring** option for the Schedule report, you can generate the report **Daily**, **Weekly**, or **Monthly**.

The following screenshot is an example of **Create Reporting Schedule** page:

← Create Reporting Schedule:

Once the report is created, the **Reporting Schedule** page displays the report status as **Active**, **Inactive**, or **Finished**. These statuses are listed in the **Status** column.

← Reporting Schedule: [redacted]

Reporting Schedule (4)

Create reporting schedule for this dashboard. Maximum of 5 active schedules can be created.

Create Schedule

| REPORT NAME | CREATED BY | RECIPIENTS | STATUS ↑ | FORMAT |
|---------------------------|------------|----------------------|----------|--------|
| TruRisk Score for Wind... | [redacted] | [redacted] 3 more | Active | PDF |
| Numerical Widget detai... | [redacted] | [redacted] 2 more | Inactive | PDF |
| Windows assets details... | [redacted] | [redacted] | Finished | PDF |
| TruRisk Score for Wind... | [redacted] | [redacted] 3 more | Finished | PDF |

To perform any action on the Active, Inactive, or Finished status reports – click the report name and from the **Quick Actions** menu, select **Edit**, **Clone**, **Activate**, **Deactivate**, or **Delete** actions for Schedule report. You can **Clone** or **Delete** an On Demand report.

← Reporting Schedule: [redacted]

Reporting Schedule (4)

| 181..+ | NEW | REMOTE | 43 |
| 181..+ | NEW | AUTHENTICATED | 19 |

Issue Addressed

- In this release, we have fixed an issue where the partial dashboard banner would get printed in the middle of the dashboard data.
