Qualys Unified Dashboard v1.x

Release Notes

Version 1.5
April 6, 2023

What's New

Create a Copy of the Dashboard

Introduced Keep Selection Persistent for Tags

Qualys Unified Dashboard 1.5 brings you many more improvements and updates!

Create a Copy of the Dashboard

With this release, we have introduced the **Create Copy** option that allows you to create dashboard copy with or without selecting the tags. Using this option, you can create a copy of the existing dashboard with the desired asset tags and persist these tags.

To create a copy of the dashboard, from the Tools ⚙ menu, select **Create Copy**.

For more information on creating a copy of the dashboard, see the *Unified Dashboard* online help.

Introduced Keep Selection Persistent for Tags

We have introduced a toggle **Keep Selection Persistent** for tags to keep the tag selection persistent. You can enable this toggle if you have Edit Dashboard Permissions. Enable the toggle and select the tags from the Recent & Favorite or All tags to keep the tags persistent. You can remove these tags while the Keep Selection Persistent option is enabled.

For more information about filtering a dashboard using tags, see *Unified Dashboard* online help.
